PROFILE

Mobile engineering lead, 6 years, hired repeatedly as the person who fixes apps other teams have given up on. Took a quick-commerce app at 173K MAU from 3.8★ to 4.8★ and #129 to #43 in its Play Store category, with the highest crash-free rate in its segment. At Wiom, rebuilt five production apps solo and cut bugs per release from 250+ to 2. Currently building and running a six-repo production platform end to end — two Flutter apps, five Node microservices on GCP Cloud Run, three Next.js frontends — so scoping, shipping, and owning the outcome is the normal mode, not the exception. Available for contract engagements, remote.

WHAT I TAKE ON

App Performance & Crash Rescue

LEAD OFFER

Your app is slow, crashing, or losing its store rating and nobody can find why. I profile it, classify the crashes, and fix the causes — cold start, ANRs, memory, networking, release stability. Fixed-scope audit or ongoing.

Fractional Mobile Lead

For teams with junior or contract mobile devs and no senior owner. Architecture decisions, code review, release process, crash triage, mentoring. Typically 10–15 hrs/week on retainer.

Flutter Delivery

Feature work or full app builds in Flutter — clean architecture, BLoC/Cubit, offline-first caching, payments, maps, deeplinks, push. Android and iOS, store submission included.

Backend & Platform

Node/Express services, PostgreSQL and Prisma, Razorpay and payment flows, Cloud Run deploys with CI/CD. Taken on where it sits alongside the mobile work rather than as standalone backend contracting.

EXPERIENCE

Founder & Principal Engineer

Jul 2026 – Present

Phool Gobhi · consumer fitness platform

Designing and building a full production platform solo — the whole stack, live, with real users and real money moving through it.

- Two Flutter apps (customer + partner), five Node/Express microservices behind an API gateway on GCP Cloud Run, three Next.js frontends — six repos, all shipped and deployed
- JWT auth with rotating refresh tokens shared across web and mobile clients; Razorpay wallet, payouts and webhook reconciliation; Firebase phone auth and FCM
- PostgreSQL with Prisma per service; GitHub Actions CI/CD with per-service change detection, health verification and migration gating; first-party analytics pipeline with funnel dashboards
- Play Store closed testing, force-update gating, signed QR check-in with geofencing, and a Places-backed location stack with no client-side API keys

Mobile Tech Lead

Dec 2025 – Jul 2026

Ozi Technologies Pvt. Ltd. · quick commerce

Brought in as engineering lead when the app sat at 3.8★ with heavy crash-driven churn at 173K MAU. Led a team of 5 across quality, velocity and revenue.

- Stability** — classified and eliminated 38,000+ crashes in a single app version; drove crash-free sessions to 99.8% and ANRs from 228 to 2
- Cold start** — cut startup time 52% (620ms → 295ms) across 34K+ sessions; first interaction time 25s → 2s
- Shipping velocity** — refactored home screen architecture, cutting complexity 81% and enabling 3× faster feature delivery

- **Revenue** — shipped free-gifts campaign driving 25K+ orders in 6 weeks; daily orders ~550 → 1,000+
- **Reach** — rebuilt the networking layer for offline browsing and overhauled deeplinks so push and social campaigns route instantly

Senior Mobile Developer

Apr 2024 – Dec 2025

Wiom — Omnia Information Pvt. Ltd.

★ Coder of the Month

- Rebuilt five production apps solo. Introduced clean architecture, Hive and BLoC/Cubit across all of them; refactored 5,000-line files into 250–300 line modules.
- **Partner App** — notification delivery 50% → 96%; median ticket resolution 1.5h → 30 min; task allocation cut ticket hoarding 75%; page load 20–25s → 1.5s; bugs per release 250+ → 2
 - **Customer App** — full rebuild in 2 months with offline-first caching; cut Google Places API cost ₹18 → ₹9 per customer, saving ₹27L/month; launch 15s → 3s
 - **Expert, LMS and Store** — LMS delivered solo in 15 days with zero user issues for 2,000+ users on unstable APIs; Store delivered solo in 25 days including UI/UX

Senior Mobile Developer — direct US client delivery

Jun 2023 – Jan 2024

Right Sol Pvt. Ltd.

- **Programming Hub** — EdTech app teaching 15+ languages, built in collaboration with Google experts for the US market
- **Grateful Diary** — AI journaling app with ChatGPT integration and encrypted automated cloud backup; sole developer end to end
- Ran client communication and requirements directly with US stakeholders; delivered both on schedule

EARLIER

Senior Mobile Developer

Neodocs Technologies Pvt. Ltd.

Feb 2023 – May 2023

- Pregafaith — 5,00,000+ downloads, 10,000+ in the first 2 days
- Kidney & Malaria diagnostics — OCR/AI card-scanning delivering lab-quality results via phone camera

Founder

BizzBuzz Marketing & Zoop Delivers

Jan 2021 – Jan 2022

- BizzBuzz — 12-person digital marketing agency, 10 clients
- Zoop — hyperlocal delivery; 6+ partners, 3,000+ orders

Mobile Developer & iOS

Gmagica Technology Pvt. Ltd.

May 2022 – Jan 2023

- MOOV MONEY — mobile payment gateway for West Africa; separate iOS builds for Benin, Ivory Coast and Togo
- Managed clients across 3 countries directly

Mobile Developer & Android

APP SCRIP Pvt. Ltd.

Apr 2020 – Dec 2020

- Built and shipped multiple Flutter apps; owned UI design and delivery timelines

STACK

Languages	Dart, Kotlin, Swift, JavaScript, TypeScript	Architecture	Clean Architecture, MVVM, BLoC/Cubit
Mobile	Flutter, Jetpack Compose, native Android & iOS	Backend	Node.js, Express, Prisma, REST
Storage	PostgreSQL, MongoDB, Hive, Drift, SQLite	Cloud & CI	GCP Cloud Run, Vercel, GitHub Actions, Docker
Performance	Crashlytics, BigQuery, Flutter DevTools profiling	Integrations	Razorpay, FCM, Cloudinary, Google Maps, deeplinks
Web	Next.js, React, Tailwind	Spoken	English (fluent) · Hindi (native)
